Subject: Reject proposed changes to cleanup plan

I strongly urge you to reject the proposed changes that would reduce the cleanup of Portland Harbor. While estimated health risk of BaP has changed, there is still a great deal of uncertainty regarding the health effects of this chemical, especially when combined with other compounds known to be present in the Portland Harbor site. In light of this uncertainty, maintaining the plan outlined by the 2017 Record of Decision is the responsible way to protect the health of river users for generations to come. Please reject the proposed changes.

Sincerely,

(b) (6)
